Structure & Organization

- We will use MATLAB, but you will also have access to materials in Python

Structure & Organization

- We will use MATLAB, but you will also have access to materials in Python
- While I don't mind receiving your homework in Python, I recommend sticking to MATLAB for consistency

Question: What do you think about starting 15 minutes later?

What You Can Expect

- This will be a programming class

What You Can Expect

- This will be a programming class
- To make the most out of this class, I recommend playing around and finding out

- This will be a programming class
- To make the most out of this class, I recommend playing around and finding out
- This can be in class (by following along) or at home

- This will be a programming class
- To make the most out of this class, I recommend playing around and finding out
- This can be in class (by following along) or at home
- I will present you with the tools of the trade, best practices, and answer any questions you may have :)

- This can be in class (by following along) or at home
- I will present you with the tools of the trade, best practices, and answer any questions you may have :)
- I will try to include a recap or summary of the previous week

- This is more to do with you than me, I wouldn't like to play a cat and mouse game

- This is more to do with you than me, I wouldn't like to play a cat and mouse game
- General recommendation:

- This is more to do with you than me, I wouldn't like to play a cat and mouse game
- General recommendation:
- If you're learning something for the first time, try to keep your use of AI limited to explanation/clarification purposes, and to discuss your thoughts

The Dataset
Overview

- Observational (no experiments) study involving 416 subjects

- Observational (no experiments) study involving 416 subjects
- Cross-Sectional: Observations were made at a single time-point

The Dataset

- Observational (no experiments) study involving 416 subjects
- Cross-Sectional: Observations were made at a single time-point
- Contains summary features of the MRI scans (we won't analyze images)
